

# SDSN NETWORKS IN ACTION 2021

SUSTAINABLE DEVELOPMENT  
SOLUTIONS NETWORK  
A GLOBAL INITIATIVE FOR THE UNITED NATIONS

“The 2021 Networks in Action Report is an inspiring record of leadership by universities around the world to collaborate and promote urgently-needed solutions for the SDGs. In the face of a complex global crisis, SDSN’s Networks have demonstrated their commitment, ingenuity, resilience and flexibility. The worldwide growth of SDSN membership and the five new SDSN networks are testimony to the vital importance and relevance of the university networks.”

Jeffrey Sachs, President, SDSN

# Introduction to SDSN’s Networks Program

In 2015, 193 countries adopted the Sustainable Development Goals (SDGs) as a shared blueprint for peace and prosperity, for people and the planet. The transformation that is needed to make this vision a reality is enormous in scale and complex. Universities are well-positioned to support this transition. They develop new technologies, business models, and governance frameworks; train future leaders to be globally-conscious and innovative; and have a proven track record working with diverse stakeholders, including governments, the private sector, civil society, and international organizations.

The Sustainable Development Solutions Network (SDSN) mobilizes the world’s academic and research institutes and leverages their strengths to help realize the SDGs and the Paris Agreement. It has operated under the auspices of the UN Secretary-General since 2012. The SDSN pursues its mission by working with over 1,500 member institutions in 134 countries, organized into over 43 networks at the national and regional level. This expertise is channeled into multi-stakeholder events, pilot projects and SDG implementation in the field, and reports, including the Sustainable Development Report and the World Happiness Report, which have been downloaded millions of times.

In their respective countries and regions, SDSN supports our networks of universities, research centers, and other knowledge institutions in:

- Localizing and mobilizing support for the SDGs, including supporting governments in understanding and addressing the challenges of sustainable development;

- Promoting high-quality education and research collaboration for sustainable development;
- Vetting and launching solution initiatives, including supporting the preparation of long-term pathways

Networks in Action report presents our unique global network of problem solvers and their contributions to addressing the world’s most pressing problems.

This year’s edition features a specific focus on the impact our networks have had in the world – from their efforts to localize the SDGs in their countries, engage with knowledge institutions and youth, improve education for the SDGs, fight the Covid-19 pandemic, advocate for a sustainable recovery, promote viable solutions initiatives, and develop their publications, events and actions.

Despite the setbacks due to the Covid-19 pandemic, most of the SDSN networks have seen their membership and impact grow significantly over the past 12 months. While the overall global membership of SDSN has grown by 17% compared to 2020, the number of knowledge institutions joining SDSN networks has almost doubled in certain regions. Moreover, the report shows how SDSN’s networks successfully executed their digital transformation, organizing dozens of online events and reaching wider audiences than ever before. Their improved online presence on social media was also accompanied by thousands of downloads of publications as well as the establishment of new partnerships relating to the Voluntary National Reviews, National SDG planning, and youth initiatives.

# Rethinking Multilateralism

## BALANCE OF UNDERSTANDING, NOT A BALANCE OF POWERS

Nation States and the world as a whole cannot be understood without multilateralism. Multilateralism is the breeding ground for nations to develop and progress in the benefit of all of humanity. The 2030 Agenda, adopted unanimously by all 193 UN Member States in 2015, embodies the positive potential of multilateralism, and SDSN, with over 40 networks and 1500 member institutions throughout the world, evidences the impact that multilateralism can have.

Today, our multilateral system faces unprecedented global challenges and must adapt to the current reality. The world urgently needs an effective, sustainable and inclusive multilateral system.

### HUMANITY AT A NEW CROSSROADS

The Covid-19 pandemic has further damaged our social fabrics and widened existing gaps. The deep health, political, economic, and social crises that have flared during the epidemic have worsened due to failed international cooperation, inconsistent guidelines, limited access to public health, and vaccine nationalism. Among other consequences, this has resulted in widening social ruptures that have deepened the gap and distanced already marginalized populations on the basis of gender, race, ethnicity or religion. From global warming, destabilized nations, deepening inequalities to the so-called "totalitarianism of surveillance" of private data corporations, the world is faced with immense challenges that can only be dealt with effectively with knowledge and in a cooperative manner. Tackling global challenges unilaterally is simply not an option.

There are undeniably virtuous initiatives already in place that seek to provide solutions to our current problems. The 2030 Agenda and Sustainable Development Goals mark a clear path as to how the global community can respond to these threats, and build better and enduring societies. The United Nations' Secretary General also recently announced a Common Agenda designed to accelerate the implementation of these goals and other shared sustainability agreements. The roadmap does so through twelve commitments which include the protection of the

**Miguel Ángel Moratinos Cuyaubé**  
High Representative of the United Nations Alliance of Civilizations (UNAOC). Member of the SDSN Leadership Council

planet and the promotion of peace and prevention of conflicts, as well as the ensuring of sustainable financing, the improvement of digital cooperation and the participation of women and youth in political decisions. Furthermore, initiatives such as the SDSN and its Leadership Council mobilize global scientific and technological expertise and promote integrated approaches for co-creating pathways towards a better future through education, research, policy analysis, and global cooperation. SDSN's Leadership Council is a body which brings together approximately one hundred leading figures from very diverse professional backgrounds. Within it, eminent experts on sustainable development from academia, civil society, business and public policy brainstorm

collectively and offer guidance to their peers in national and regional networks that deliver practical solutions to these and other challenges by gathering universities, research institutes, think tanks and NGOs. Together, as a network, these knowledge institutions are able to translate the latest expertise in sustainable development into action, quickly and across borders, at all scales from local to global. Examples of SDSN networks' actions range from formulating recommendations for research and innovation agenda for Thailand's regions to discussing public policies and corporate initiatives for solid waste reduction in the Amazon. These are just a few of the many efforts that are underway in order to address today and tomorrow's puzzling future.

### UNILATERALISM AND MULTILATERALISM À LA CARTE

Global issues require global, integrated answers, supported by the international community and its citizens. On the one hand, multilateralism *à la carte* is neither an option nor a solution for any Member State. It is not sufficient for a nation to adopt a multilateralist approach towards preventing future pandemics and fighting against climate change while maintaining a unilateral and nationalist stance regarding, for instance, peace and conflict resolution. On the other hand, the main objective of multilateralism is in no way to homogenize the political reason and action of the world's nations and key players. Differences in culture, religion, ethnicity or political ideology offer rich windows of opportunity for critical reasoning and development. Drawing upon the knowledge and educational capacity of SDSN members, national and regional networks of SDSN have been countering unilateralist approaches to development with cross-disciplinary systems thinking and the rapid diffusion of sustainable development know-how.

Current political shifts between the world's powers seem to be leaning towards a divide that separates West from East, splitting the world into a binary order that is far from representative of our complex and interconnected reality. Political and military alliances reminiscent of the Cold War are fostering a lack of trust between traditional partners and hampering the only chance we, as an international community, have to save humanity.

### THE PATH TOWARDS AN EFFECTIVE AND SUSTAINABLE MULTILATERALISM

Multilateralism and its platforms, from the United Nations to the European Union, must prevail as the main mechanisms for seeking sustainable solutions to the many problems that lie ahead. These systems of dialogue and understanding, however, are far from adjusted to the current realities of

our societies. The world has seen massive changes which have brought to the forefront a set of legitimate and critical players that cannot be ignored.

The leaders of the international community have to understand the vital role played by youth, women, migrants and other marginalized populations in their societies and capitalize on their knowledge; by the private sector, the media, *influencers*, artists or athletes and their capacity to sway public opinion. Cities and regional governments must also be empowered as they are the prime responders in national emergencies.

Moreover, deep economic, social and technological transformations that are needed to achieve the Agenda 2030 and keep global warming to "well below 2°C" simply cannot happen without academic expertise that helps diagnose complex and multi-dimensional challenges of sustainable development and define long-term sustainable pathways. Experts from the academic community must be connected to decision makers to share their knowledge and expertise based on the latest research.

Choosing not to incorporate these actors when devising a new social contract and attempting to return to the early 20th century's 'business as usual' would inevitably set humanity on a dark path of no return. Unless, like Nero, we are ready to play the fiddle while watching Rome burn, a democratic, inclusive, sustainable and green multilateralism is the only answer.

The question therefore is not if we should maintain multilateralism but rather how to rethink and refund it. The established systems also proved that we could work together towards constructing a better future for all, one free of wars, hate and discrimination, based on the fundamental principles of human rights and dignity. These systems of international cooperation are the only way to respond to the many threats humanity is currently facing. We find ourselves at a critical crossroads where only mutual collaboration and respect can provide sustainable and effective answers. Unilateralism and binary approaches to the complex, multicultural and interconnected reality of the 21st century will only accelerate the planet in an irreversibly detrimental direction. However, for multilateralism to be able to face these challenges and provide sustainable solutions, it must integrate a whole new range of key actors that, along with Nation States, will be able to provide effective and global answers to unquestionably global problems. It is time to *deideologize* the term 'multilateralism' and to understand that only by working together will we save ourselves. Instead of returning to outdated strategies that seek a 'balance of power', let us search for a 'balance of understanding'.

# SDSN and GIZ Collaboration for Sustainable Development:

Conclusion of a successful Network Managers Workshop in New York in 2018 / © GIZ

## 8 Years and Counting

The global challenges of the 21st century require global partnerships in the development of sustainable solutions. For this purpose, the *Deutsche Gesellschaft für Internationale Zusammenarbeit* (GIZ) GmbH has partnered with SDSN since 2013 to support the identification of scalable solutions within the framework of the 2030 Agenda. Commissioned by the German Federal Ministry for Economic Cooperation and Development (BMZ), the GIZ project advises the SDSN Secretariat and Networks in order to contribute to the achievement of the SDGs within countries and regions worldwide.

The project currently focuses on four fields of activity:

1. Support in the development of metrics and data visualisation tools that track the global effects of national actions, so called spillovers.
2. Promotion of research on data-based policy design, in particular with regard to questions of gender equality and the 'Leave No One Behind' principle.
3. Support to the Networks in the Global South through capacity development efforts, and advice to the SDSN team on questions related to network development and management.
4. Enabling knowledge exchange on pressing topics, such as COVID-19 recovery, in order to formulate concrete guidance on how the 2030 Agenda can be taken into consideration in overcoming socio-economic crises.

Over the last 8 years of collaboration, SDSN and GIZ have realized a number of successful projects in promoting sustainable development worldwide. Mentionable highlights include:

- **Annual Workshops** for Network Managers have been providing an open space for knowledge exchange, strategic planning, and team building across national and regional Networks. Past editions have been facilitated in New York and Stockholm, before switching to a virtual format in 2020 due to the COVID-19 pandemic. Previous workshops have incorporated innovative methods, for example Lego Play Serious Play to facilitate creative thinking and processes.
- An **Initiatives Lab** contest identified several innovative solutions for implementing the 2030 Agenda within the Networks. The winner of the 2020 contest, a user-friendly, open-access platform for monitoring SDG progress in South

Lego Serious Play at the Network Managers Workshop in 2018 / © GIZ

America by SDSN Amazonia and SDSN Andes, has received mentorship in its development.

- **Research Papers and Policy Briefs** on the impacts of global production and consumption patterns have allowed SDSN to consolidate its role in international debates on Spillover effects. Additionally, indicator results and data visualisation tools have been integrated in SDSN's annual flagship publication, the Sustainable Development Report, which has ensured a wide and professional readership for the topic.

Looking ahead, the SDSN and GIZ collaboration promises to be exciting in the upcoming months:

- **Three research grants** will be awarded to selected SDSN Networks for them to provide evidence-based policy recommendations for aligning the COVID-19 recovery with the 2030 Agenda.
- An **Initiatives Lab process**, initiated by a design-oriented virtual Barcamp, will lead to the implementation of SDSN members' most innovative solutions for reducing inequalities and for making COVID-19 recovery strategies more inclusive.
- An upcoming **policy brief on sustainability in supply chains**, which will be funded by GIZ, will further advance the knowledge on the impacts of international production and consumption patterns on global public goods.

The GIZ team thanks all SDSN colleagues for another year of successful collaboration.

"Networking" at the Network Managers Workshop in 2017 / © GIZ

# Networks & SDSN Flagship Initiatives

## FOOD, AGRICULTURE, BIODIVERSITY, LAND USE AND ENERGY

A collaborative initiative, operating as part of the Food and Land-Use Coalition (FOLU), to understand how countries can transition towards sustainable land-use and food systems. To design and implement the sustainable transformation of these systems, FABLE Consortium mobilizes top knowledge institutions from more than 20 countries to support the development of decision-support tools and long-term pathways. Many SDSN national networks contribute their technical expertise to this initiative and are part of the FABLE Country Teams.

## THE FOOD, ENVIRONMENT, LAND AND DEVELOPMENT ACTION TRACKER

Strategic initiative under the Food and Land Use (FOLU) Coalition to track action and support countries on the transformation of food and land use systems. Its objective is to systematically analyse national policies related to food and land use, assessing country level action against national and global targets under the Paris Climate Agreement and the SDGs.

## GLOBAL SOLUTIONS FORUM

The Global Solutions Forum brings together the people who are implementing local initiatives designed to help achieve the SDGs. They meet in an inclusive space to share progress, to highlight important takeaways, and to inspire one another to keep moving forward. As the leading global network of knowledge-creating institutions in support of the Agenda 2030, the SDSN has unique expertise and avant-garde solutions for sustainable development. Through the Global Solutions Forum, we are committed to showcase and highlight our members' most impactful solutions. This global event intends for them to gain global visibility and recognition, but also serve as an important virtual gathering of experts to learn from one another and make a difference.

This initiative offers an opportunity for our Networks to engage their members and work with a variety of stakeholders, including the private sector, in implementing specific locally relevant solutions. Furthermore, it offers the selected Solution Initiatives widespread communication and media coverage, with the aim to promote the upscale of these Solution Initiatives worldwide.

## THE INTERNATIONAL CONFERENCE ON SUSTAINABLE DEVELOPMENT

Hosted jointly every September alongside the UN General Assembly by SDSN and the Global Association of Masters in Development Practice (MDP) Programs, ICSD is a global event that provides a forum for academia, government, civil society, UN agencies, and the private sector to come together to share practical solutions to achieve the Sustainable Development Goals (SDGs). This high-level event brings together more than 1,900 participants to hear the latest research on the SDGs and keynote addresses from heads of state, senior UN officials, CEOs, and global thought leaders. A number of SDSN networks and members intervene each year to present, the most recent advanced knowledge and findings on sustainable development.

## PATHFINDER INITIATIVE

In response to the need for urgent and decisive action to keep within the 1.5 - 2°C target of the Paris Agreement, the Pathfinder Initiative aims to increase motivation and capacity by showing how the implementation of well-designed policies and technologies can yield multiple benefits for people and the planet.

The Pathfinder Initiative is led by researchers at the London School of Hygiene & Tropical Medicine (LSHTM). SDSN is acting as a partner organization, together with the OECD, C40 Cities, CDP and Alliance for Health Policy and Systems Research, hosted by the WHO.

The initiative will assess and synthesise lessons from the implementation of practical, evidence-based pathways to zero-carbon societies. It will highlight knowledge gaps and identify how to address challenges of implementation across diverse settings. This supports evidence-informed decision-making on real-world case studies and robust scientific evidence. With scientific oversight provided by The Lancet Pathfinder Commission, the Pathfinder Initiative aims to accelerate progress towards a healthy and prosperous future for all in a 'post-carbon' society.

In the first half of 2021, as a partner organization, SDSN supported the dissemination of the call for case studies, aimed at mapping the evidence of health benefits from carbon reduction actions.

## SCIENCE PANEL FOR THE AMAZON (SPA)

An initiative convened under the auspices of SDSN, the SPA brings together over 200 scientists - two thirds from Amazonian countries to undertake an unprecedented assessment of the state of the Amazon ecosystems, trends and implications for the long-term well-being of the region while also exploring opportunities and policy relevant options for conservation and the sustainable development of the basin. The report will call upon governments, the private sector, financial institutions, the global community and civil society at large to act together for the conservation and development of a sustainable Amazon. SDSN Amazonia will provide strategic inputs, support the review process, and assist with disseminating the final report to local partners. More at [theamazonwewant.org](https://theamazonwewant.org) and [@theamazonwewant](https://twitter.com/theamazonwewant).

# SDG ACADEMY

A leading creator and curator of free online educational resources on sustainable development. This offering includes more than 30 Massive Open Online Courses (MOOCs) on the SDGs and related interdisciplinary topics taught by world-leading experts from across the SDSN community and beyond; a searchable library of educational video content; themed webinars; and a Community of Practice that brings together educators from across SDSN member institutions and social enterprises to advance education for sustainable development through peer exchange and learning. The SDG Academy collaborates with SDSN members through this Community, as well as through the creation and integration of SDG Academy educational content, such as the Sustainable Food Systems: A Mediterranean Perspective MOOC created with SDSN Mediterranean.

# SDGs TODAY

Initiative advancing the production and use of real-time and geo-referenced data for the SDGs with a one-of-a-kind data platform, and education and training resources. Product of SDSN's collaboration with ESRI and National Geographic Society, this global hub for real-time SDG data encourages countries, institutions, and civil society members to produce, share and engage with the data to help ensure that we meet the Global Goals by 2030. SDGs Today and ESRI organized a workshop for SDSN networks in 2020 and are supporting SDSN Andes and the Jeffrey Sach Center at Sunway University with their geospatial projects.

# SDG INDEX

The first worldwide study to assess where each country stands with regard to achieving the SDGs, using most up-to-date data to track and rank the performance of all UN member states on the SDGs. Sustainable Development Report benefits from extensive contributions from the SDSN networks, involved in the collection and validation of data that informs the section on government efforts for the SDGs, as well as in the dissemination of the report's findings. SDSN networks also lead and contribute to the production

### Global editions

### Regional editions

### Subnational editions

of regional editions (Africa, Arab States, Europe, Latin America and the Caribbean) and subnational editions (Bolivia, Brazil, Italy, Malaysia, Spain, United States) of the SDG Index and Dashboards.

# SDSN YOUTH

Global youth program empowering young people to create sustainable development solutions. SDSN Youth has 140 team members working in more than 35 different countries across 23 established Regional and National Networks. The programme has built a global movement of over 4000 program members. Each Regional/National Youth Network is embedded into its corresponding SDSN Network, focusing on mobilizing young people towards achieving the SDGs. The activities in the national and regional networks are coordinated by 17 active network coordinators.

# THE LANCET COVID-19 COMMISSION

The Lancet COVID-19 Commission is an interdisciplinary initiative that cuts across the health sciences, business, finance, and public policy. The Commission will develop recommendations on suppressing the epidemic, addressing the resulting humanitarian and economic crises, and rebuilding an inclusive, fair, and sustainable world. It will also promote solutions to improve global public health and support an equitable, transformative, green, and digital recovery. More at [covid19commission.org](https://covid19commission.org) and [@Commissioncovid](https://twitter.com/Commissioncovid).

# ZERO EMISSIONS SOLUTIONS CONFERENCE

Formally known as the Low-Emissions Solutions Conference, ZESC is an annual SDSN conference held alongside the UNFCCC Conference of Parties. This forum serves as an opportunity for SDSN members to influence critical national discussions on decarbonization and the future pathway to a net zero world. ZESC provides a platform of dialogue and a match-making function between countries, cities, companies, and sector experts on innovative technology and policy solutions to implement the Paris Agreement.

# Join the SDSN!

**Our global network of problem solvers is always expanding. Join us and enhance national and regional capacity to address sustainable development challenges.**

As a member of the Sustainable Development Solutions Network, your institution will be part of a unique network of problem solvers and contribute to practical solutions for sustainable development. Together, we work towards supporting sustainable development in three main areas:

1. Localizing and mobilizing support for the SDGs, including supporting governments in understanding and addressing the challenges of sustainable development;
2. Promoting high-quality education and research collaboration for sustainable development;
3. Vetting and launching solution initiatives, including supporting the preparation of long-term pathways.

**SDSN Membership is FREE and open to any university, research institute, research- and science-oriented civil society organizations and foundations, and other institutions that have deep expertise in one or more areas related to sustainable development.**

Government entities and private sector institutions/for-profit businesses are not eligible for membership but are welcome to join as partners. Universities can join at the level of the university or an individual department/institute.

Applying for SDSN membership is simple – the online membership application form is on our website and is available in English, French, Portuguese, Russian, and Spanish:

[www.unsdsn.org/join-the-sdsn](http://www.unsdsn.org/join-the-sdsn)

## SDSN MOBILIZE

SDSN Mobilize is our exclusive internal communications platform for all 1500+ SDSN member organizations around the world. Our aim is to help turn thoughts into action, provide inspiration, and facilitate the exchange of knowledge and expertise within our global network of problem solvers. The platform facilitates a direct line of communication between members, geographic and thematic networks, and the SDSN Secretariat. Mobilize is our members' one stop shop for networking and connecting.

As part of the SDSN online community, representatives from SDSN member institutions can identify and connect with peers, increase the outreach of their projects and activities, position their organization as leaders in their field, find new prospects for collaboration, ask questions, identify funding opportunities, and draw upon the community's ever-growing expertise. To date, SDSN Mobilize boasts around 4,000 individuals in this one-of-a-kind pool of sustainable development experts. Once a week, we shine a light on one of our incredibly diverse members, highlighting their work in our "SDSN Mobilize Member Mondays". Additionally, the platform features exclusive content like a comprehensive weekly compilation of funding opportunities in sustainable development. We also help our members apply for grants, participate in conferences, identify fellowships, publish research, and much more.

SDSN Mobilize invites all faculty and researchers at SDSN member institutions to join and actively participate.

# SDSN National and Regional Networks

SDSN's National and Regional Networks promote the localization and implementation of the SDGs, develop long-term transformation pathways, provide education for sustainable development, and launch Solutions Initiatives to address challenges. Each network focuses on distinct projects and priorities in line with their local contexts and challenges.

# Africa

SDSN Great Lakes and SDSN Belgium will join forces to organize an **INTERNATIONAL CONFERENCE** on SDG 4 in December 2021

Nyungwe Park, Rwanda / @FaustinTuyambaze

**HOSTED BY:**

University of Rwanda,  
College of Business and  
Economics

Kigali, Rwanda

great-lakes.unsdsn.org

@GreatSdsn

**YOUTH**

During a virtual 10-week educational program, 14 Rwandan students from different higher education institutions learned to build innovative and sustainable digital solutions, for some of the most pressing challenges in their communities. The programme was hosted by Home Association, in partnership with the University of Rwanda and SDSN Great Lakes Youth.

**SOLUTIONS INITIATIVES**

Dr. François Xavier Ndungutse and his team from the UHTGL Goma joined the 2020 Global Solutions Forum and presented an innovative approach to professionalizing the pig value chain in DR Congo. This solution can ensure that the production of livestock meets the growing demand.

**FLAGSHIP INITIATIVE**

First prize of the Network's Home-Grown Solutions Award 2020 was awarded to Josee Uwamariya and her project – Innovation in Pottery. Her concept aims to halt the disappearance of traditional woman-led pottery-making by teaching female potters to use crushed glass and plastic waste as materials for creating new, unique, environmentally-friendly pots based on traditional designs and methods.

SDSN Great Lakes hosted **3 WEBINARS** including a public lecture in January 2020 on promoting the engagement of academic community in supporting the implementation of the SDGs which attracted close to **200 PARTICIPANTS**

Lake Victoria, Tanzania / @René Bauwens

**University of Rwanda, College of Business and Economics**

The College of Business and Economics (CBE) is one of the six colleges composing the University of Rwanda (UR), the largest public university in the country. The UR's vision is to be a leading university that develops highly enterprising graduates prepared and dedicated to building a more just and sustainable society locally, nationally, and globally, with appropriate innovations that advance the quality of life. The UR's mission is to support the development of Rwanda by discovering and advancing knowledge, and being committed to the highest standards of academic excellence, where students are prepared for lives of service, and leadership, transforming communities through finding solutions.

**COVID-19 & RECOVERY**

Staff in several member universities are participating in COVID-19 Task Forces. Universities have also been allocating space to quarantine and treatment centers. Meanwhile, students have been volunteering in many cities and towns to help enforce existing health measures.

The region scores high on the Spillovers index, with all countries'

**INDEX ABOVE 97**

University of Nairobi SDGs youth hub Sports event / @SDSN Kenya

**ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS**

SDSN Kenya facilitated the exchange of ideas on the 17 SDGs in Kenya by forming an academic forum with representation from 6 public and 1 private university.

The Network coordinated with the members of academic staff from those universities to author 8 articles that were then published by Africa Habitat Journal.

4 Webinars on different sustainability topics with a total of

**130 ATTENDEES**

**SDGs IN FOCUS**

SDSN Kenya has earmarked 10 Kenyan universities to host and spearhead the promotion of specific SDGs in the country. On SDG 4, each university is now involved in ensuring equal access for all women and men to affordable quality technical, vocational and tertiary education, including universities.

**Moi University**

Moi University is a public university located in the town of Eldoret in western Kenya. It was established as the second university in Kenya by an Act of Parliament, the Moi University Act of 1984. The University is working through the Center for Public Sector Reforms (CPSR), a think tank hosted by the Department of Political Science, to offer first hand theoretical research; advocacy and capacity building, all geared to contribute towards boosting oversight and good governance of the public sector.

**Nairobi University**

The University of Nairobi, a body corporate established by Act of Parliament Cap 210 of the Laws of Kenya is the pioneer institution of University education in Kenya and the region. The only institution of higher learning in Kenya for a long time, the University of Nairobi responded to the national regional and Africa's high level manpower training needs by developing and evolving strong, diversified academic programmes and specializations in sciences, applied sciences, technology, humanities, social sciences and the arts.

**SDG LOCALIZATION**

Leveraging on virtual platforms, SDSN Nigeria addressed themes that touched on local issues. One of these was a webinar on the extractive sector in the age of sustainable development, which helped to proffer practical solutions to the ecological and security challenges caused by mining in Nigeria.

In early 2021, the TearFund Nigeria asked the Nigerian Network to embark on a consultancy for the development of a framework for "Transitioning to a Green Economy" in Plateau State.

**EDUCATION FOR THE SDGs**

The Network's thematic Group on Education developed a curriculum for teaching the SDGs in tertiary institutions. The curriculum was presented to the National Universities Commission and further efforts are ongoing to replicate these in the primary and secondary schools.

Sensitisation of secondary school students about Goal 3 on World Sickle Cell Day / © SDGs Student Hub, University of Ibadan

**YOUTH**

The Nigerian Network has actively supported the ongoing youth-led movement against brutality and excessive violence by the forces of order. The Network published a press release condemning the violence and has since developed a 2-year peacebuilding program for major youth influencers in Nigeria together with SDSN Youth Nigeria.

**23% MEMBERSHIP GROWTH** in 2020/2021

Members of the Local organising committee at ISDS 2021

**Centre for Sustainable Development, University of Ibadan**

The University of Ibadan's Centre for Sustainable Development (CESDEV) was established in 2010 as a demonstration of the University's commitment to sustainable development. It was based on the need to provide an intellectual platform for identification of issues germane to sustainable development, to critically analyse them, and provide leadership in finding enduring solutions that will enhance sustainable development. The University of Ibadan is a public research university in Ibadan, Nigeria. The University was founded in 1948 as University College Ibadan, and it became an independent university in 1963. It is the oldest degree-awarding institution in Nigeria.

**4 PUBLICATIONS** released

**ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS**

The Nigerian Network actively promoted membership and gained four new university members in early 2021. The network also deepened engagement with the Office of the Senior Special Assistant to the President on SDGs. In particular, the network's experts were invited to a stakeholders workshop in February 2021 to help validate survey findings on national SDG implementation.

## 3 WEBINARS HELD on the cadastral sector in Senegal

Lac Rose, Senegal / @curioso

**HOSTED BY:**

Université Cheikh  
Anta Diop

Dakar, Senegal

sahel.unsdn.org

@SDSNsahel

**PARTICIPATION IN SDSN INITIATIVES**

As part of the “Data For Now” initiative supported by GIZ & TRENDS, a series of multi-stakeholder conferences was organized in Senegal to highlight the relevance of the use of urban data, but also to engage all stakeholders in the implementation and monitoring of the SDGs. It was an opportunity to discuss data gaps in Senegal and to strengthen the data ecosystem on cadastral data and information. A report on an inventory of data and tools was produced.

**YOUTH**

As part of the implementation of the “take action” phase, SDSN Youth Sahel organized a trip for youth leaders to the Saloum Islands in order to improve their knowledge about development challenges at the community level and to inform the activities of the student hub.

SDSN Sahel Youth

**FLAGSHIP INITIATIVE**

As part of a pan-African partnership strategy, SDSN’s African networks and the SDG Centre for Africa held a virtual informational meeting in April 2021. This collaboration aims to enable a pan-African perspective on good practices and their scaling up to the continental level.

## 90 PARTICIPANTS attended SDSN Sahel’s VirtuForum 2020

**SOLUTIONS INITIATIVE**

SDSN Sahel organized an International “VirtuForum” on the SDGs, with the objective to create a framework for exchange, dialogue, and collaboration amongst the actors and decision makers in the sustainable development sector in the Sahel.

**Université Cheikh Anta Diop**

Université Cheikh Anta Diop is the oldest and largest Francophone university in Africa. It was founded in 1957 as the University of Dakar. The name was changed to Université Cheikh Anta Diop de Dakar in 1987 in honor of the leading Senegalese scholar, politician, and proponent of African unity who died the previous year. Today, the university is one of the leading educational institutions on the continent and includes six colleges and numerous institutes and specialized programs, with over 60,000 students from around the world.

**SDG LOCALIZATION**

SDSN Uganda was launched on 21st April, 2021 under the theme "Unlocking the potential of Universities and other non-state actors to foster achievement of SDGs" was attended by academia, government officials, civil society and private sector. The event was an important milestone in creating awareness of the SDGs and the role that academic institutions can play.

SDSN Uganda is working closely with Uganda's SDGs Secretariat in the office of the Prime Minister. The Network also participates in the Government SDG Coordination meetings, which support the Voluntary National Review (VNR) stakeholder engagement processes and provide advice on implementation of the SDGs across sectors.

**60 PARTICIPANTS**  
attended SDSN Uganda's launch  
event and the recording has since  
been viewed over 100 times

**COVID-19 & RECOVERY**

SDSN Uganda participates in the Makerere University's public awareness campaigns which assist in public understanding of the vulnerabilities of poor urban communities in Kampala and Jinja cities on COVID-19 related shocks and stresses.

SDSN Uganda team after the network launch event

Uganda equator / @Masami Tukeuchi

**FLAGSHIP INITIATIVE**

SDSN Uganda is working in partnership with the Makerere University Centre for Climate Change Research and Innovations (MUCCRI), the Cities Alliance, Jinja City, and ACTogether to implement a project on urban migration management that will produce technical reports and 2 publications by the end of 2021.

**Makerere University**

Makerere University is the leading public university in Uganda, and one of the oldest and most prestigious universities in Africa. The University is made up of 10 Constituent Colleges and offers a wide range of disciplines including agriculture, business, economics, education, engineering, medicine, law, and more. Within Makerere University, SDSN Uganda is hosted by the College of Agricultural and Environmental Sciences which is a leading training and research institution in agriculture, environment, and natural resource management. The network's Secretariat is in the Makerere University Centre for Climate Change Research and Innovations (MUCCRI).

Uganda's best scoring goal is  
**SDG 13 ON  
CLIMATE ACTION**

**YOUTH**

SDSN Uganda has embarked on the process of establishing an SDSN Youth national network. A series of webinars are planned for the youth in the second half of 2021 focusing on the role of youth in advancing the SDGs.

2020 SDSN Amazonia Award: Sustainable Solutions to face COVID-19 in the Amazon / Up Comunicações

**Foundation for Amazon Sustainability (FAS)**

Foundation for Amazon Sustainability (FAS) is a Brazilian non-governmental organization that has helped over 10,000 families, benefiting 41,808 people living in 647 communities in 16 Conservation Units (UC) across Brazil's Amazonas state. FAS, founded in 2007, promotes sustainable development of the Amazon Basin, including environmental conservation, improvements to the quality of life

**SDGs IN FOCUS**

“The Clean Rivers, Clean Oceans” project created video tutorials (in Portuguese and Spanish) for people to adopt new sustainable actions and avoid waste pollution.

Also, the network organized a high level forum to discuss public policies, as well as corporate and social initiatives to reduce solid waste in the Amazon.

**225 SOLUTIONS INITIATIVES**

featured in the Amazon Sustainable Development Solutions Platform, available in English, Spanish, and Portuguese.

**FLAGSHIP INITIATIVE**

On the occasion of the Amazon Day, Green Economy Coalition (GEC) and FAS, launched the Amazon Green Economy Hub, aimed at developing a network of practitioners, investors, policy makers, and small enterprises.

**ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS**

SDSN Brazil's member mapping exercise in 2020 brought ten new higher education institutions to the network, located in eight different states of Brazil.

**11 NEW MEMBERS IN 2020,**  
an increase of 16.42%

**FLAGSHIP INITIATIVE**

The network's awareness-raising campaign conducted throughout 2020 across university campuses engaged about 20.000 of its staffers and students.

On World Environment Day (June 5), the Chair of SDSN Brazil, a UNEP representative, participated in a special television program: E agora? Which discussed PUC-Rio's engagement with the SDGs.

SDSN Brazil's 2020 Annual Conference focused on the topic of "Cooperation for an Equitable future". Together with the representatives of the Brazilian Business Council for Sustainable Development, the Brazilian Foundation for Sustainable Development and UN-HABITAT Brazil, the conference discussed the SDG performance in the country, the network's and the members' ongoing initiatives and partnership opportunities.

PUC-Rio brought representatives of the eight departments to present some of the initiatives in the area of teaching and research that involve efforts aligned with the achievement of the SDGs.

**Pontifical Catholic University of Rio de Janeiro (PUC-Rio)**

Pontifical Catholic University of Rio de Janeiro (PUC-Rio) is a non-profit philanthropic university based on Christian humanistic principles. It is an academic center of excellence in Brazil, welcoming around 16.000 students each year. PUC-Rio values excellence, being well-ranked nationally as well as internationally, and offering scholarships and exchange programs through its numerous partnerships around the world. The Interdisciplinary Center of Environment (NIMA) supports cooperation to face interdisciplinary socio-environmental questions and hosts the executive secretariat of SDSN Brazil.

**1,500 PEOPLE ATTENDED**

and watched the Launch of the SDG Atlas during the virtual Bolivian Conference on Development Economics

**ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS**

SDSN Bolivia, together with the University of Trento in Italy, the ifo Institute in Germany, and the Institute for Human Development in India won a 4-year, 1.5 million Euro grant from the Fondazione ComPagenia di San Paolo to research the levels, drivers and spatial distribution of unfair socio-economic inequalities within and between countries, focusing on Bolivia, Germany, India, and Italy. Partnering with the Global Living Wage Coalition, SDSN Bolivia will help calculate, publish and update living wage benchmark estimates for different locations around the world, using the Anker Living Wage Methodology.

**Universidad Privada Boliviana (UPB)**

Universidad Privada Boliviana (UPB) is one of the top universities in Bolivia and Latin America. According to América Economía, UPB is among the 23 best business schools in Latin America and is the only Bolivian university to be included in this prestigious ranking. Headquartered in Cochabamba, UPB also has a campus and post graduate center in La Paz, and a new campus has just been inaugurated in Santa Cruz.

**Fundación Solidaridad y Desarrollo Productivo Sostenible (SOLYDES)**

Fundación SOLYDES is a foundation based in La Paz, which was established in 1987 with the sole purpose of fighting poverty in Bolivia by supporting innovative initiatives. Since then, Fundación SOLYDES has been a central actor in the development and consolidation of the microfinance sector in Bolivia and has strengthened productive entrepreneurship with positive social impacts.

- @sdsncanada
- SDSN Canada
- SDSN Canada

FLAGSHIP INITIATIVE

SDSN Canada co-hosted the Together|Ensemble conference in 2020, Canada's all-of-society conference devoted to tracking progress for the SDGs. The conference was an important milestone in Canada to deepen commitments and create new collaborations for the SDGs. Over 100 speakers and an audience of 1,400 attendees participated in more than two dozen sessions.

SDG LOCALIZATION

SDSN Canada is working on an SDG Cities Index for Canadian municipalities to measure progress on SDG 11 targets. The research team consulted with municipalities throughout the country on the design of an interactive dashboard that will allow users to view progress among select cities.

YOUTH

SDSN Canada has supported the establishment of 13 SDG Student Hubs across the network. The hubs organized more than 50 events from Jan.-Apr. 2021, ranging from on-campus SDG activities, networking opportunities, and initiatives with campus administration. The hubs are also working together nationally on an action campaign to have provincial governments declare a climate emergency.

**SDG LOCALIZATION**

SDSN Mexico was part of the Intersectoral Working Group established by the Federal Government to elaborate the country's 2021 Voluntary National Review with information on how universities, research centers and social innovation entities contribute to the implementation of the 2030 Agenda within the sector and their communities.

SDSN Mexico is building a Necessities Platform (Plataforma de Necesidades), which has the purpose to map specific requests from strategic groups and link them with projects and activities which can yield effective solutions for sustainable development.

**SOLUTIONS INITIATIVES**

SDSN Mexico launched the Project Bank (Banco de Proyectos), a platform that provides assessment to 66 selected projects that seek to contribute to the implementation of the SDGs nationwide. Through an online platform, anyone can offer technical or financial support and capacity building for the projects.

The Network recruited, by open call, more than 300 specialists (ExpertODS) from all sectors to exchange knowledge and articulate capacities in favor of sustainable development in Mexico. This community will form working groups for the development of projects and routes to accelerate the implementation of the SDGs in Mexico.

San Miguel de Allende, Mexico / @Jezael Melgoza

From January 2020 to May 2021, the network **DOUBLED ITS MEMBERSHIP**, going from 31 to 73 member institutions.

**Tecnológico de Monterrey**

Tecnológico de Monterrey is a private university system founded in 1943 in Monterrey, Mexico. It holds 26 campuses located across 25 cities in the country, and 18 liaison offices in 15 countries. Its academic programs are recognized by international accreditation agencies, and its research approaches are pursued with open international collaboration: "knowledge-driven creation" and "society-driven innovation".

**Universidad Nacional Autónoma de México (UNAM)**

Universidad Nacional Autónoma de México (UNAM) was founded in 1551 and is the biggest and most important public university in Mexico and Ibero-America. The fundamental aim of the UNAM is to serve both the country and humanity, to train professionals, to organize and carry out research, mainly on national problems and conditions, and to offer cultural benefits in the broadest sense possible.

ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS

SDSN Afghanistan organized a two-day orientation workshop on the SDGs and the existing monitoring frameworks for the senior leadership and faculty members of Kateb University. The outcomes of the workshop were used to develop the capacity building plan for Kateb University.

On December 1, 2020, the network organized an orientation workshop to inform scholars, university students, NGO staff, and the public about the SDGs and the work of SDSN Afghanistan. It raised awareness about the network, enhanced membership drive and engagement in its projects.

EDUCATION FOR THE SDGS

Organizing the “Roles of Universities in implementing the SDGs in Afghanistan” conference in September 2019 enabled Kateb University to start the dialogue around the involvement and engagement of academia in helping the government of Afghanistan to achieve the SDGs by 2030. Following the conference, SDSN Afghanistan was set up to gather academia and knowledge-generating institutions to help advance this agenda. In this context, Kateb University, as the host institution of SDSN Afghanistan, provided initial funding for the design of “University SDG Capacity Building program” to assess and expand the capacity of universities regarding the SDGs.

Kateb University

Kateb University, a pioneer private university, is currently the top ranked university as per the Afghanistan National Accreditation indexes. It has over 5,000 students currently studying in ten academic disciplines at Bachelor and Master’s level. Kateb has an applied research institute and five research centers in areas of management science, economics, social science, and engineering and computer science. Kateb also has over 150 local partners from the private sector, government, and civil society organizations and research and educational linkages with universities and organizations in Canada, Indonesia, Turkey, India, Iran, England, and the United States.

SDSN Afghanistan’s Facebook account currently reaches nearly **2,227 PEOPLE** with posts in English and Dari.

Darul Aman Palace / @ Noorullah Barezai

More than **1.000 PEOPLE** have participated in the virtual and in person events of SDSN Afghanistan so far.

SDG LOCALIZATION

SDSN Afghanistan piloted the “University SDG Capacity Building Program” at its host institution, Kateb University. The program assesses capacities in universities for the achievement of the SDGs and intends to close existing gaps. The pilot project concluded the elaboration of a three-year capacity building plan at Kateb University in the domains of Teaching and Learning, Governance, Advocacy and Leadership, Public Policy and Program Support, and Research. Moving forward, the network plans to implement the program at the national level and has already received expressions of interest from several public and private universities in the country.

### SDG LOCALIZATION

Since its establishment, TUSDG works closely with the central and local government of the P.R.C. on SDG localization.

This year, SDSN China Hub collaborated with the Development and Reform Bureau of the Deqing County, Hunan University of Science and Technology on the Implementation Plan on the 2030 Agenda for Sustainable Development in Deqing County (2021-2025), the first SDG implementation plan for a local county in China, covering all 17 SDGs.

By integrating the cutting-edge geographical information technology in Deqing, this report is an essential reference for local governments on 1) an explicit SDGs action plan, 2) evidence-based policy making towards SDGs, and 3) practical roadmaps for SDG localization.

### ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS

For its 110th anniversary, Tsinghua University launched the University Report on the SDGs, the first university SDGs report in China that combines qualitative and quantitative methods. It is a testimony to Tsinghua University's global vision and its determined efforts on SDGs implementation.

Siddharth Chatterjee, UN Resident Coordinator in China, and Prof. Jeffrey Sachs, both delivered congratulatory speeches for Tsinghua's outstanding contributions for achieving the SDGs.

### EDUCATION FOR THE SDGS

Spanning six continents and 27 countries, over 99 students have been enrolled in the MPP-SDGs programme since 2017.

#### Institute for Sustainable Development Goals of Tsinghua University (TUSDG)

Founded in April 2017, the Institute for Sustainable Development Goals of Tsinghua University (known as TUSDG) is housed in Tsinghua University in Beijing, China. It aims to establish a leading platform to conduct interdisciplinary research and collaborate with global partners to boost the implementation of the SDGs.

**COVID-19 & RECOVERY**

- The Hong Kong Jockey Club Charities Trust (HKJCCT), SDSN Hong Kong co-host, donated US\$192 million for COVID-19 relief initiatives, including:
  - Improving pandemic preparedness and facilities at about 1,030 (or 95% in Hong Kong) residential care homes for the elderly and disabled.
  - Food assistance to those in hardship amid the pandemic, introducing automated food dispensers and online food delivery platforms.
  - Jockey Club Interactive Wonder Box, a learning kit delivered to 130,000 kindergarten children, provides quality sensory stimulation at home during their crucial development period.

**FOCUS ON SPECIFIC SDG**

SDG 13 is one of SDSN Hong Kong's priorities. In May 2021, the Network, MoCC and the Hong Kong Green Building Council, hosted the 'SDG Forum Series: Green Museums and the Paris Agreement' online forum.

HKJCCT supported 120 schools to upgrade campus facilities and enhance environmental performance to achieve BEAM Plus accreditation. It also supported 35 NGOs premises to install solar power systems and educate students on sustainable energy.

In 2020/21, **SEVEN NEW MEMBERS** joined SDSN Hong Kong. The membership covers most of the Government-funded universities in Hong Kong

**SDG LOCALIZATION**

SDSN Hong Kong together with The Chinese University of Hong Kong's Jockey Club Museum of Climate Change (MoCC), launched the SDG Ambassadorship in 2021. Designed to improve students' understanding of the SDGs, the programme trained more than 40 secondary school students in Hong Kong and challenged them to create an SDG action plan for their campuses.

**SOLUTIONS INITIATIVE**

SDSN Hong Kong presented at the Global Solutions Forum its solution to extend the active and healthy lives of the city's ageing community, through 'The Jockey Club Age-Friendly City Project' as a unique 'bottom up' approach that enabled Hong Kong to be certified under WHO's AFC framework.

Students taking a closer look at solar panel installations / © The Hong Kong Jockey Club

**The Hong Kong Jockey Club Charities Trust (HKJCCT)**

Founded in 1884, The Hong Kong Jockey Club is a world-class racing club that acts continuously for the betterment of our society. The Club has a unique integrated business model, comprising racing and racecourse entertainment, a membership club, responsible sports wagering and lottery, and charity and community contribution. The Club is Hong Kong's largest single taxpayer and one of the city's major employers. Its Charities Trust is also one of the world's top ten charity donors and its supported projects covered all 17 SDGs.

**The Chinese University of Hong Kong (CUHK)**

Founded in 1963, CUHK is a forward-looking comprehensive research university with a global vision and a mission to combine tradition with modernity, and to bring together China and the West. Dedicated to research and education excellence as well as the advancement of sustainable development, the University houses the world's first climate change museum, the Jockey Club Museum of Climate Change, and several vibrant interdisciplinary research centres, including the Institute of Environment, Energy and Sustainability and the Institute of Health Equity.

## YOUTH

In August 2020, SDSN Youth Indonesia launched a series of live Q&A sessions to promote the work of SDSN and SDSN Indonesia, including the Sustainable Development Report, to the general public. Several youth member institutions were also invited to promote their work on SDGs attainment.

SDSN Youth Indonesia gave a presentation to SDSN Indonesia member institutions on opportunities for youth involvement in planning and development of future projects and programs.

## EDUCATION FOR THE SDGS

SDSN Indonesia's host institution, SDGs Hub Universitas Indonesia, successfully developed 21 modules for SDG Academy Indonesia by UNDP Indonesia. SDG Academy Indonesia also consulted the SDG Academy in New York for pedagogical review.

SDSN Indonesia provides a toolbox accessible to its members on SDG-related resources including national and international updates on the SDGs.

The dissemination event of Indonesia's Rank in the Sustainable Development Report 2020 / SDG Academy Indonesia - UNDP Indonesia

## Universitas Indonesia (UI)

Universitas Indonesia (UI) is known as a modern and green campus consisting of 320 hectares with 6 natural lakes. UI was initially established in 1849 as the Indonesian School of Medicine. Currently UI has 14 faculties that cover wide arrays of scientific disciplines with 291 degree and non-degree programs of study.

Ranked 47th in the Times Higher Education Impact Ranking 2020.

UI aims to become an independent university that can resolve national and global challenges, particularly those that impact the Southeast Asia region.

## The United in Diversity (UID)

The United in Diversity (UID) forum is a non-profit organization established with Indonesian leaders from business, government, and civil society. Founded in 2003, UID has invited leaders from all sectors to come together, start a new dialogue of responsibility, and agree on concrete actions that address root-causes of Indonesia's problems, as well as regional and world challenges.

**SDG LOCALIZATION**

Prof. Kanie, Programme Director of the SDSN Japan, was fully committed to organizing and hosting “Japan SDGs Action Festival” on 26 and 27 March 2021 as the Chairperson of the Japan SDGs Action Promotion Council, a nation-wide network of stakeholders. Under the “UN SDG Action Campaign” led by the UNDP, “SDGs Global Festival of Action from Japan” was also organized back-to-back with the above Action Festival.

SDSN Japan was deeply involved in writing and editing “Japan’s SDGs Whitepaper 2020–2021” which was published last May and summarized the latest efforts by various stakeholders in Japan to achieve the SDGs. “Japan’s SDG Whitepaper 2019” (English version) was shared at a side event during the 74th United Nations General Assembly in New York.

### PARTICIPATION IN SDSN INITIATIVES

Malaysia has formulated a state-by-state SDG Dashboard utilising ArcGIS to enable localised tracking of SDG indicators. The Dashboard is fuelled by statistics from the Malaysian Department of Statics and enables effective progress communication by emulating the SDSN SDG Index methodology.

Currently, SDSN members, Sunway University, and Universiti Kebangsaan Malaysia (UKM), are involved in the ASEAN Green Future Project, which has mobilised 7 out of 10 of the ASEAN country teams.

This initiative aims to accelerate action for decarbonisation to achieve net zero by 2050 for the ASEAN region and ASEAN member states. It involves technical simulation and modelling of net zero carbon outcomes along with associated economic and social consequences of such an undertaking.

## INVITED TO PARTNER with the Malaysian Economic Planning Unit to utilize SDG Dashboard data FOR NATIONAL SDG PLANNING

Sunway University is located within an integrated township fully connected with an elevated solar-panelled pedestrian walkway GBMC Sunway

### EDUCATION FOR THE SDGS

In an effort to advance Mission 4.7, SDSN Malaysia has begun research into potential approaches for Education for Sustainable Development (ESD) implementation and execution.

### The Jeffrey Sachs Center on Sustainable Development (JSC) at Sunway University

The Jeffrey Sachs Center on Sustainable Development is a regional center of excellence that advances the achievement of the 17 SDGs in Malaysia and Southeast Asia through education, research, and policy advice. Launched in December 2016, the Center operates out of Sunway University, a leading not-for-profit private university committed to the pursuit of education through scholarship, research, and enterprise. The University is committed to multi-disciplinary research in sustainable development within an urban environment, and promoting health, well-being, and the development of new technologies in addressing some of the world's most pressing problems. To date, the University has drawn more than 26,000 students from over 90 countries to its vibrant, 880,000-square-foot campus.

**SDG LOCALIZATION/ EDUCATION FOR THE SDGS**

SDSN Philippines completed its project entitled “Strengthening Academic-Business-Government (ABG) Partnerships to Address SDGs in the Philippines”, in partnership with the German Development Agency (GIZ). Participants of the nine workshops identified local SDG-related issues such as natural capital, food system and community livability issues. These workshops helped serve as a platform to discuss common concerns and collaborate given the newly-formed partnerships.

**FOCUS ON SPECIFIC SDG (SDG 2)**

SDSN Philippines organized an independent dialogue ahead of the UN Food Systems Summit 2021, which focused on the livelihood of Filipinos amidst the COVID-19 pandemic. A major highlight was the need to reframe the country’s food systems in order to build resilience against future vulnerabilities.

Facilitating the workshop and interacting with the participants

**KNOWLEDGE PARTNERSHIP** concluded with the SDG Coordination Centre of the State of Karnataka

**The Energy and Resources Institute (TERI)**

The SDSN South Asia Network is hosted by The Energy and Resources Institute (TERI) in New Delhi. TERI is an independent, multi-dimensional organisation, with capabilities in research, policy, consultancy and implementation. It has pioneered conservation and action in the energy, environment, climate change, and sustainability space for over four decades. SDSN SA established in 2014 brings together academic and policy institutions from around the region working on the SDGs. The network has a strong member-base of over 50 organizations, including research institutions, universities, and think tanks. The Network Chair is Dr. Vibha Dhawan who is also the Director General of TERI and the Network Manager is Mr. Souvik Bhattacharjya, Senior Fellow, Resource Efficiency & Governance, TERI.

ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS

The network collaborated with the Korea Maritime Institute (KMI) to launch the “Sustainable Development Forum for the Yellow Sea” discussing SDG 14. This was done in partnership with the OECD, the Yellow Sea Large Marine Ecosystem (YSLME) Project of UNDP, the Water Transport Institute and the First Institute of Oceanography (FIO).

The network collaborated with the Korea Development Institute (KDI) to launch a major research project involving 10 prominent experts on “How to Leverage the Korean New Deal to Implement Six Transformations for Sustainable Development” drawing on the idea of ‘Six Transformations’ proposed by the SDSN.

The network continued to support the OJEong Eco-Resilience Institute (OJERI) of Korea University that studies and monitors the water, food, and energy system sustainability in the Mid-Latitude Region (MLR).

YOUTH

The network held a nation-wide competition on solutions for SDGs for college and graduate students at the start of 2021.

COVID-19 & RECOVERY

The network held a series of discussions with the KDI in mid-2020, sharing the lessons of Korea’s so-far successful efforts to cope with the COVID-19 pandemic. This also led to the production of English-language video titled “Korea’s National Crisis Management Policy Experience in Response to COVID-19”.

**ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS**

SDSN Thailand, in cooperation with Thailand Science Research and Innovation Office (TSRI) organized the Area-Needs project (the continuation of the Foresight Thailand Project in 2020). This project aims at formulating recommendations for a regional Science Research and Innovation Agenda by using foresight techniques and incorporating SDGs into the process to ensure the balanced inclusion of the sustainability aspects. This project engaged nine universities in six regions of Thailand, and more than 600 experts from government, academic, CSO/NGOs, and private sector in the process.

SDSN Thailand is recognized and **INCLUDED IN THAILAND'S VOLUNTARY NATIONAL REVIEW 2021**

**FLAGSHIP INITIATIVE**

The SDG Watch Project was launched in January 2021 by the two host institutions - SDG Move and the International Health Policy Program (IHPP). The aim is to create a media outlet in which SDG related news, research, report, policies and other progress are shared with Thai audiences.

SDSN Thailand covered the launch of SDR 2021 by producing a press release and an insight article about Thailand SDG index. Both were quoted by 9 media outlets and reached 900 shares and 33,742 views.

**SOLUTIONS INITIATIVES**

SDSN Thailand's research series produces four volumes of Stakeholder Action Reports, each representing one of the following stakeholders: youth, volunteers, CSOs, and academia. The aim is to learn about what has been done in relation to the SDGs in these sectors and what support may be needed to advance the SDGs.

SDSN Thailand partnered with **29 ORGANIZATIONS** on various SDG-related projects

**Centre for SDG Research and Support (SDG Move), Faculty of Economics, Thammasat University**

Thammasat University (TU), founded in 1934, is known to be one of the leading universities in Thailand. TU has been a part of several social transformations of the country, often dubbed as "the university of the people". As a co-host of SDSN Thailand, SDG Move offers SDG-related multidisciplinary policy research and training programmes. It also mobilizes an academic network to promote sustainability transformation in Thailand.

**Center for Peace and Conflict Studies, (CPCS), Chulalongkorn University**

Chulalongkorn University (CU), founded in 1917, is the oldest and one of the most prestigious universities in Thailand. It is ranked as one of the "World's Top 100 Universities for the Best Academic Reputation" by QS World University Rankings 2021. CPCS, under CU, is a distinguished peace studies centre, specialized in peace studies and conflict resolutions. CPCS has been using its expertise to facilitate multi-stakeholder dialogues for the SDGs in Thailand.

**Technology and Informatics Institute for Sustainability, National Science and Technology Development Agency (NSTDA)**

NSTDA has a mission to perform and support scientific, technological, as well as engineering research and development, in response to the need of the country's development. The Technology and Information Institute for Sustainability (TIIS), under NSTDA, aims to serve as a central body to house the database for sustainable development as well as to develop a data management system in accordance with the international criteria.

# Europe & Eurasia

EUROPE & EURASIA

European Parliament

## COMMON INITIATIVE OF SDSN NETWORKS AND MEMBERS IN EUROPE

SDSN Europe was launched in December 2020 as an initiative aimed at mobilizing scientific and technological expertise in support of a sustainable and resilient European Recovery. The initiative builds on the momentum created by the European Green Deal and the Next Generation EU, and enhances SDSN's contribution to the work on sustainable development across the continent.

With twelve national and regional networks of universities and knowledge institutions in Europe, involving over 360 member organizations, SDSN is set to advocate for the alignment of such recovery with the SDGs and the Paris Climate Agreement. Building on SDSN's work on the Six Transformations, Europe Sustainable Development Report, Fixing the Business of Food and FABLE, SDSN Europe is placing emphasis on the European Green Deal, National Recovery and Resilience Plans of the Member States, Sustainable Seas, Agri-Food Systems, as well as other thematic areas co-designed with the European networks.

Under the leadership of Adolf Kloke-Lesch (SDSN Germany), Prof. Angelo Riccaboni (SDSN Mediterranean) and Prof. Phoebe Koundouri (SDSN Greece), SDSN Europe acts as a coordination instrument for SDSN networks and members to catalyze actions on issues related to European policy.

Similarly to the leadership, SDSN Europe's secretariat is sourced from SDSN's existing networks, working collaboratively and in close coordination with the SDSN Paris office.

## PRODUCING STATE OF THE ART RESEARCH & POLICY WORK

SDSN Europe hosts a Senior Working Group on the European Green Deal, consisting of top-level academics and stakeholders. This group supports policymakers with actionable strategies that can guide EU-wide and national economic recovery in line with the continent's overarching sustainability agenda and the SDGs.

In the first half of 2021, SDSN European Green Deal Senior Working Group published the paper titled "Transformations for the Joint Implementation of Agenda 2030 for Sustainable Development and the European Green Deal: A Green and Digital, Job-Based and Inclusive Recovery from COVID-19 Pandemic". A second report will be released in early 2022, and it will use machine learning techniques to analyze the connections between the European recovery plans and the SDGs, as well as present insights on sustainable finance and the impact of the green transition on jobs and growth.

Furthermore, two thematic groups of SDSN Europe were launched in April 2021. The first group will focus on Sustainable Agrifood Systems and Land Use. Second, the Sustainable Euro-Asian Seas (SEAs) Initiative will build on research and demonstration projects, developed by a consortium and its collaborators, and will create an SDSN high-level working group, which will work on the Science-Policy interface related to Blue Growth, as well as on producing an SDSN SEAs annual report.

Launch event of the SDSN European Green Deal Senior Working Group report

Europe Sustainable Development Report 2020

## STIMULATING ACTION THROUGH DEBATES AND PARTNERSHIPS

SDSN Europe hosted an event on the alignment of the European Recovery plans with the SDGs and the Paris Climate Agreement in October 2020. In February 2021, SDSN Europe supported SDSN Belgium and CIFAL Flanders in organizing another online event with Belgium as a case study. This webinar brought together representatives of the European Commission, the Belgian government and academia, and was attended by over 350 participants.

In early 2021, SDSN Europe also entered into several partnerships. Together with SDSN Italy, SDSN Europe provided support to the European Youth Parliament's 92nd International Session in Milano, attended by 200 young participants. Likewise, the initiative partnered with the European Sustainable Development Week (ESDW) held in September 2021. SDSN Europe will support members and networks that wish to organize events during this week as well as during the European Week of Regions and Cities, held in October 2021.

the webinar on the alignment of the European and Belgian recovery plans with the SDGs

### University of Antwerp

The University of Antwerp is a young, dynamic and forwardthinking institution, and one of the Young Universities for the Future of Europe (YUFE). More than 20,000 students are enrolled, of which 20% are international students. Ecology and sustainable development are some of the frontline research domains. Specifically, SDSN Belgium is hosted by the Institute of Environment and Sustainable Development (IMDO). IMDO offers multidisciplinary research and education programs that aim to support the complex challenges of society, industry, and authorities on sustainability questions.

### Catholic University of Louvain

The Catholic University of Louvain (UCLouvain) is Belgium's largest French-speaking university. It welcomes more than 30,000 students in seven locations in Brussels and Wallonia. The university offers courses in all disciplines, from bachelor's degree to doctoral degree level, as well as many lifelong learning programmes. It is also a pioneer in the creation of massive open online courses (MOOCs), and the first French-speaking university in Europe to offer online courses on the edX platform. UCLouvain is amongst the top 1% universities worldwide.

### PARTICIPATION IN SDSN INITIATIVES

Together with CIFAL Flanders, SDSN Belgium and SDSN Europe advocated for aligning the European and Belgian recovery with the SDGs. The role of the SDGs in the recovery and resilience plans was discussed in a webinar which hosted senior officials from the European Commission and Belgian Government.

### SOLUTIONS INITIATIVES

Large knowledge networks are difficult to align and manage, risking to lose scientific progress due to lack of detailed insights and effective communication. Belgian professors Vera Meynen and Ludo Diels created multi-purpose, well-connected and integrated clusters of researchers that are small but through their connection keep an integrated view and leverage their impact towards a carbon neutral industry and society. This solution was shared at the 2020 Global Solutions Forum.

**SDG LOCALIZATION**

The Aristotle University of Thessaloniki, host of SDSN Black Sea, and the Financial University under the Government of the Russian Federation, published the "Feasibility Study for a Black Sea SDGs Observatory". The study, funded by the Black Sea Project Promotion Facility (BSPPF), identifies the strengths and weaknesses of such an Observatory, which could serve as one of the main axes for SDSN Black Sea to pursue regional collaboration.

**4 EVENTS**  
on the involvement of students  
and academia in the  
implementation of the SDGs  
each attracted more than  
**100 PARTICIPANTS**  
from several countries

**EDUCATION FOR THE SDGS**

SDSN Black Sea, SDSN Mediterranean and the ERASMUS+ funded EUSTEPs project co-organized an event about how HEI educators can use interactive tools and materials for teaching and implementing sustainability on campuses. It was attended by 94 educators from 30 countries.

**YOUTH**

Since SDSN Youth Black Sea was established in July 2020, it organized many events informing young people about the SDGs while allowing them to actively participate in the network. The event "Our Future through the Sustainable Development Goals" welcomed more than 200 young people from different academic backgrounds and 40 countries to discuss how the SDGs can be achieved through various scientific fields.

**PARTICIPATION IN SDSN INITIATIVES**

Via SDSN Europe, the Black Sea, Greek and Mediterranean SDSNs established the Sustainable Euro-Asian Seas Initiative (SEAS), to accelerate science-driven blue growth and the implementation of Agenda 2030 in the Euro-Asian Seas. The related high-level working group will work on the science-policy interface related to Blue Growth, as well as on producing an annual report.

**SDG LOCALIZATION**

At the request of the Cypriot Directorate General for European Programmes, Cooperation and Development, the country's competent authority for the SDGs, SDSN Cyprus provided inputs for the 2021 Cyprus Voluntary National Review, which was presented at the HLPF.

**COVID-19 & RECOVERY**

SDSN Cyprus Leadership Council Member and Manager of SDSN Europe, Theodoros Zachariadis, co-authored a report for the World Bank entitled: "Building Back Better in Practice: A Science-Policy Framework for a Green Economic Recovery after COVID-19". This report and other interventions were integrated into the Cyprus Recovery and Resilience Plan, which was recently submitted to the European Commission.

Prof. Zachariadis also contributed to SDSN Europe's event, entitled: The Future Europe Wants: A Green and Digital, Job-Based and Inclusive Recovery from COVID-19 Pandemic.

**FLAGSHIP INITIATIVE**

Frederick University, SDSN Member, contributed to the SDG Academy Spotlight Initiative, by shedding light on architectural heritage.

**The Cyprus Research and Educational Foundation (CREF)**

The Cyprus Research and Educational Foundation (CREF) was established in February 2004 driven by the vision of promoting the advancement of knowledge and its humane and benevolent applications throughout the Eastern Mediterranean and Middle East, highlighting the role of Cyprus as a gateway of knowledge and innovation between EU and the region and to help in the transformation of Cyprus' economy into a knowledge-based economy. To realize its vision and objectives, CREF planned the establishment of a new research and educational institution, which would promote research and education in Cyprus and its region. CREF designed the new institution, The Cyprus Institute (Cyl), aiming at benefiting the public interest at large. The Cyprus Institute, which is both a research and educational institution, as well as the physical manifestation of CREF, is the physical location for the Secretariat of SDSN Cyprus, and provides all the necessary administrative backstopping.

### SDG LOCALIZATION

In the run-up to German Federal elections in September 2021, SDSN Germany held private exchanges with the leadership of all democratic political parties on how best to include the 2030 Agenda and the SDGs in their respective election manifestos. SDSN Germany thereby strengthened the political relevance of the 2030 Agenda in Germany.

## 2.000 FOLLOWERS REACHED

on social media in 2020. The tweet of the year had 92 likes and was shared 41 times

### ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS

In the process of the overhaul of the German Sustainability Strategy, SDSN Germany recommended six transformations and five levers as the framework to move forward until 2030. Its recommendations were ultimately adopted by the German government in the new German Sustainability Strategy (Deutsche Nachhaltigkeitsstrategie). After the official adoption of the new strategy, SDSN Germany, together with other knowledge institutions, organized events on each of the five levers to increase their uptake in different parts of society.

Specific policy recommendations on the basis of these events will be made for the incoming government in autumn 2021.

**COVID-19 & RECOVERY**

SDSN Greece participates in the Lancet COVID-19 Commission, promoting best practices in the control of the pandemic, social protection, and recovery.

Prof. Phoebe Koundouri and Prof. Jeffrey Sachs launched the SDSN European Green Deal Senior Working Group aimed at supporting successful implementation of this transformative regulatory framework.

SDSN Greece organized events on the acceleration of innovation towards a sustainable recovery from the COVID-19 Pandemic.

Organized 30 and participated in  
**130 INTERNATIONAL EVENTS**  
with an audience ranging from 30 to 500 participants

**FLAGSHIP INITIATIVE**

The Sustainability Summit for South-East Europe and the Mediterranean has become a seminal platform for sustainability discourse at the regional level, with its mobilization of resources and the participation of prominent international business and finance leaders, along with cabinet ministers, academics, and Nobel laureates from around the world.

**YOUTH**

SDSN Youth Greece, in partnership with Get Involved, developed an e-Democracy project that aims to address the main challenges resulting from the COVID-19 pandemic. The network also supported 24-hour climate hackathons called Greek Climathons.

**PARTICIPATION IN SDSN INITIATIVES**

The Greece, Black Sea, and Mediterranean SDSNs, through SDSN Europe, are leading the Sustainable Euro-Asian Seas (SEAs) Initiative, which builds on research and demonstration projects to create a high-level working group, which will work on the science-policy interface as it relates to blue growth, as well as on producing an SDSN SEAs annual report.

In 2020, SDSN Greece welcomed  
**11 NEW MEMBERS,**  
an increase of 45% compared to  
the previous year

**ATHENA Research Center**

In 2021, ATHENA RC became the third host institution of SDSN Greece. Previously, the network worked closely with the ATHENA Research and Innovation Centre team via the Sustainable Development Unit and EIT Climate-KIC Hub Greece, both directed by Professor Phoebe Koundouri. A significant part of SDSN Greece's research and administrative activities are carried out under ATHENA RC.

**International Center for Research on the Environment and the Economy (ICRE8)**

ICRE8 is a nonprofit, private institution dedicated to interdisciplinary research on sustainable development and management of the environment, energy, economy, and eco-innovations.

**Political Economy of Sustainable Development Lab (PESD)**

The PESD Lab of the National and Kapodistrian University of Athens is devoted to the political economy dimension of sustainable development.

sdsnitalia.it

@SDSN\_Italia

**SDG LOCALIZATION**

Two new reports and one online portal released by SDSN Italy and FEEM in 2020 assess the SDG performance in Italy at the national and sub-national levels. The reports reveal where Italy and its cities stand five years after the adoption of the 2030 Agenda and two years after the publication of the SDG City Index.

The new online SDG Portal provides the state of the art on urban sustainable development, increasing citizens' awareness and facilitating national and international dialogue to promote and accelerate progress towards full sustainability.

**EDUCATION FOR THE SDGS**

SDSN Italia, together with SDSN Mediterranean, the Italian Alliance for Sustainable Development, the Italian Network of Universities for Sustainable Development, Leonardo, and ENEL Foundation, organized the 3rd edition of the Siena Summer School on Sustainable Development. The Advanced School gathered speakers from academia, public institutions, and businesses. Participants gained knowledge and skills in policy, science and innovation and new business models for sustainable development.

Palazzo Pubblico, Siena

### SDG LOCALIZATION

Together with the National Coordinator for the Agenda 2030 in Sweden, SDSN Northern Europe started a project with 16 partners (8 universities and 8 municipalities and regions) aiming to jointly identify problems and generate solutions for the local and regional context. Given the pivotal role of municipalities and regions for society's implementation of the SDGs and the role of universities in bringing knowledge and solutions for sustainable development, several SDG localization initiatives are being implemented in the nordic countries.

### COVID-19 & RECOVERY

The network conducted a survey among the member universities' staff to collect experiences and attitudes from the transition caused by the Covid-19 pandemic. The data from the survey will allow member universities to outline a future strategy on travel and on the use of online meetings.

## 9 ONLINE EVENTS

organized by The network secretariat in 2020 welcomed approximately

## 300 PARTICIPANTS

### ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS

An analysis of how member universities in Northern Europe communicate sustainability on their international websites was performed. 37 member universities in the Nordic countries were analyzed and guided to improve their sustainability communication.

### EDUCATION FOR THE SDGS

To promote education for sustainable development, the SDG Impact Assessment Tool was applied in five courses at the University of Gothenburg and Chalmers University of Technology. To scale up this initiative, several workshops were held where university teachers could test the tool in a teaching situation.

@SDSNRussia

### SDG LOCALIZATION

SDSN Russia co-authored the first Civil Society Report on SDGs Implementation in Russia made by KURS (the Coalition for Sustainable Development of the Country). Published alongside 3 governmental reports, the report shows an alternative vision on the SDGs implementation in Russia.

SDSN Russia's host research institution, RANEPА, worked with the metrics of SDGs implementation in Russia and presented the SEM model, which explains the variations of the latent variable («sustainable development») through indicators of economic, social and environmental development.

RANEPА also cooperates with Russian governmental bodies on the SDGs implementation.

### PARTICIPATION IN SDSN INITIATIVES

RANEPА is contributing to SDSN FABLE and developing a FABLE calculator and a GLOBIUM model for Russia.

More than  
**20 WEBINARS**  
and events hosted in 2020,  
gathering over  
**1000 PARTICIPANTS**  
in total

### YOUTH

SDSN Youth Russia, in partnership with SDSN Russia and RANEPА, launched the "Vaccination against Covid-19" guide that will increase awareness about the importance of the COVID-19 vaccine among young people in Russia. So far, the guide has reached more than 300 young people.

SDSN Youth Russia and SDSN Russia launched and successfully conducted their first short-term volunteering program in research and educating activities.

SDSN Youth Russia's webinar on achieving responsible consumption without going to extremes attracted 50 young people.

The new Russia Youth Solutions Report will include more than 40 youth solutions.

### Russian Presidential Academy of National Economy and Public Administration (RANEPА)

Russian Presidential Academy of National Economy and Public Administration (RANEPА) was founded in 1946 as a public administration school for civil servants. Today RANEPА is one of the most well-known universities in Russia, hosting a very prestigious business school, and considered a national educational leader in public administration. Its think tank provides top-notch expertise to government officials and its regional campuses spread across 53 Russian regions.

REDS / SDSN-Spain

Red Española para el Desarrollo Sostenible (REDS)

EDUCATION FOR THE SDGS

REDS has established different tools to support the implementation of the SDGs within universities and higher education centers: three reports about measuring, good practices and how to accelerate the SDG education in the Spanish universities.

**51 MONTHLY NEWSLETTERS**

circulated since September 2015

SDG LOCALIZATION

In the fight against depopulation in Spain, REDS promoted a project which aims to connect the SDGs with the rural dimension and expand the 2030 Agenda's scope beyond the urban area. The results of the survey that was carried out in two "emptied rural areas" in Spain were collectively interpreted in a multi-stakeholder workshop hosted in March 2021. Conclusions can be useful to the rural world in order to draw their own roadmap towards the SDGs.

REDS' multi-stakeholder workshop on culture and sustainable development gathered over 100 cultural agents from all over the country to discuss the National Strategy for Sustainable Development. The network delivered the conclusions to the Spanish Government, published a practical guide for integrating the 2030 Agenda in the cultural sector and released the first Spanish website entirely dedicated to culture and SDGs.

The second edition of the report "The SDGs in 100 Spanish cities" published by REDS measures the progress of the SDGs at the local level since 2018. The 2020 report focuses on the SDG 12 and is complemented by an interactive website and a visualization tool.

Leire Pajín, SDSN Spain Chair, before the Joint Committee of the Spanish Congress for the Coordination and Monitoring of the Sustainable Development Strategy / ©REDS

Universidad Autónoma de Madrid (UAM)

The REDS association is hosted in partnership with Universidad Autónoma de Madrid (UAM). The UAM has earned itself a prestigious reputation as a state-of-the-art public university in view of the high-quality teaching and research activities on offer. Guided by its vocation to serve society, the academic and social values of its centres and services are reflected in their activities which aim to enhance solidarity, cooperation and the overall health of people and the environment.

FLAGSHIP INITIATIVE

El Día Después, REDS' multi-stakeholder platform for transformative partnerships currently hosts four communities for knowledge and practice that generate specific actions to respond to critical challenges relating to the SDGs.

**20+ ESTABLISHED PARTNERSHIPS,**

## SDG LOCALIZATION

SDSN Turkey contributes to raising awareness and developing capacity among the Turkish municipalities on SDGs together with the Union of Municipalities of Turkey, Marmara Municipalities Union, and other Municipalities.

SDSN Turkey organized multiple webinars on circular economy and on localizing the SDGs in the cities.

The network also contributed to Voluntary Local Review (VLR) Reports of Izmir Metropolitan Municipality, and the Municipality of Sultanbeyli, Istanbul, the first VLRs of Turkey.

## ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS

SDSN Turkey organized various education programs for k12 schools and university teachers focusing on the SDGs, such as "Climate 2030 with Children and Youth", "Climate 2030 with Teachers", "Water Academy for Youth and Agenda 2030: ESD for Teachers", SDSN Turkey-BOUN 101 SDGs camps. The programs reached more than 600 teachers and 10.000 students.

**ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS**

SDSN UK was established in 2021 as the new UK hub of the global SDSN network. The network spent the first half of 2021 planning the launch of the first-ever UK-based SDSN, which included scoping out the wider UK sustainable development landscape, especially focusing on existing SDG research in UK universities. The UK network engaged in network building with existing members, as well as attracting new partners from various academic institutions. The hub explored alignment between members on key research topics, both existing and new. After a series of conversations held with potential members, SDSN UK attracted a small group of leading academic institutions across the UK. The initial members of the UK SDSN include: SOAS, University of Northampton, University of Strathclyde, University of Aberdeen, University of Manchester, University of Warwick and University of Winchester.

**130 000+ STUDENTS**

SDSN UK host, the Institute for Innovation and Public Purpose at UCL / IIPP

IIPP's Advisory Board members Jayati Ghosh, Stephanie Kelton and Carlota Perez with Director Mariana Mazzucato / IIPP

SDSN UK held a 'Soft Launch' event in late June 2021, where members got together for informal networking and to discuss network priorities and future agenda. The launch was the network's first official event, in preparation for a formal launch on 1st December 2021. The event was attended by 15 representatives of 7 universities across the UK and received positive feedback from the guests, who had the opportunity to ask questions about network management to representatives from SDSN Global and SDSN Northern Europe and find common interests with fellow academics.

**Institute for Innovation and Public Purpose, University College London**

The SDSN UK hub is hosted by the Institute for Innovation and Public Purpose (IIPP) at University College London. The mission of IIPP is to change how public value is imagined, practiced and evaluated to tackle societal challenges and, by doing this, deliver economic growth that is innovation-led, sustainable and inclusive. IIPP encourages people to imagine a new role for the public sector as an ambitious and entrepreneurial partner with the private sector. The institute is nested within University College London, which is one of the UK's premier universities, consistently ranked in the world's top 10 and whose staff and former students have included 32 Nobel Prize winners. IIPP forms part of the Bartlett Faculty of the Built Environment that ranks number one for Architecture and the Built Environment in the QS World Ranking.

'Soft Launch' event, 15 participants include

**REPRESENTATIVES FROM 7 ACADEMIC INSTITUTIONS ACROSS THE UK**

# New and Upcoming Networks

## Newly Approved Networks

### SDSN Czech Republic

The Czech Republic is the best performing country in Central and Eastern Europe on the SDG Index and among the top 10 in the world. SDSN is working on establishing a national network hosted with the Charles University Environment Centre (CUEC), the country's leading research institution focused on interdisciplinary sustainability science. Established in 1348, Charles University is the oldest university in Central Europe, and the largest, most renowned and the best-rated institution of higher education in Czechia.

### SDSN Pakistan

In December 2020, SDSN's Networks Strategy Council enthusiastically approved the creation of SDSN Pakistan hosted by the Institute for Global Health and Development at The Aga Khan University. Besides addressing pressing national needs like poverty alleviation and improving health, the network is setting out to work on the globally shared challenges of climate change and environmental protection. The official launch is envisaged for spring 2022.

### SDSN South Africa

The University of Pretoria was recently approved to host a new national network in South Africa. UP also hosts the South Africa SDG Hub, which connects policymakers with the research and innovations needed to implement the SDGs. The network will be formally launched in early 2022.

### SDSN Western Balkans

Western Balkans are united by their wish to join the European Union and secure a more sustainable future for the new generations. Agenda 2030 offers an opportunity to build a consensus vision for social development in the region, with full respect of distinct identities. Shared Society and Values Foundation and the Institute of Economics in Sarajevo are working on establishing a regional SDSN network, which will mobilize knowledge institutions and other relevant actors for the implementation of the SDGs.

## Upcoming Networks

### Argentina

The 3rd largest economy in Latin America and G20 member, Argentina was an active participant in the negotiation process that led to the 2030 Agenda. Its national development priorities are adapted to locally implement and achieve the SDGs. SDSN is in discussions with the Centro de Implementación de Políticas Públicas para la Equidad y el Crecimiento (CIPPEC) and Fundación Bariloche to establish a National SDSN.

### Bulgaria

Implementing the SDGs is a task of great importance for most countries in the world. Bulgaria is no exception. Since the adoption of the 2030 Agenda, all the country's strategic documents refer to the SDGs. SDSN is currently in discussions with the University of National and World Economy (UNWE) with regard to the creation of a new SDSN network in Bulgaria.

### Georgia

At the intersection of Europe and Asia, Georgia has demonstrated commitment to implementing the 2030 Agenda. While Georgian universities have engaged with the SDSN's Black Sea regional network, the University of Georgia has expressed interest to create a new national network to specifically focus on domestic SDG challenges.

### Ghana

Ghana has shown a great deal of leadership on the SDGs and President Akufo-Addo is a co-Chair of the SDG Advocates. With the help of the Millennium Promise Alliance (MPA), SDSN is in discussions with the University of Education, Winneba and the University of Ghana to set up a national network.

### Kazakhstan

As a landlocked country rich in natural resources, Kazakhstan has recognized the importance of SDG achievement for the long-term prosperity of the country. However, research and educational activities around the SDGs remain low. Nazarbayev University, together with SDSN, is seeking to form a national alliance for sustainable development, connecting academia, civil society, and policy makers to help fast-track action for the SDGs in the country.

### Lebanon

Lebanon is a strategic actor in the MENA region in terms of trade, academic and research excellence, and entrepreneurship. Consistently ranked within the top 10 universities in the Arab world, the American University of Beirut is an SDSN member and has developed a proposal to host a new national network.

# Thematic Networks

# Sustainable Agriculture & Food Systems

📍 Hosted by Wageningen University & Research. Wageningen, The Netherlands.

🌐 [www.unsdsn.org/sustainable-agriculture-and-food-systems](http://www.unsdsn.org/sustainable-agriculture-and-food-systems)

Farmer in Nepal / by Arjun Jaisawal from Pixabay

The Sustainable Agriculture & Food Systems network has been organizing e-conferences since before the COVID-19 pandemic. For all e-conferences, the network supports an online platform where participants interact as they would in a 'normal' conference, by asking questions, discussing their work, and making new connections.

The network's e-dialogue series on the future of small-scale farming, organized in collaboration with Foresight4Food, IFAD, and APRA, attracted over 550 participants in the second half of 2020, with an average audience of 60 from around the globe. This initiative aims to leverage scenario thinking to address challenging questions around how small-scale agriculture can contribute to healthy, sustainable, and responsible diets. The network hosted sessions on (i) emerging trends, challenges, and opportunities for small-scale farming, (ii) local perspectives, (iii) regional perspectives, (iv) transition pathways and strategies, and (v) policy implications.

Fruit Vendors / by Dean Moriarty from Pixabay

eDialogue sessions remain available as videos on YouTube, as well as podcasts. Blogs, vlogs, and an e-discussion group allowed participants to engage further and disseminate findings. Over the same period, Network members also published articles on key issues, including the food security conundrum of sub-Saharan Africa and carbon-free conferencing in the age of COVID-19.

## Looking ahead

Outcomes of the eDialogue series will be made available for the Food Systems Summit in September 2021 and will contribute to the IFAD 2021 Rural Development Report on Food Systems, being prepared by Wageningen University and Research in collaboration with a global network of researchers.

## Wageningen University & Research

The mission of Wageningen University and Research is to explore the potential of nature to improve the quality of life. The strength of Wageningen University & Research lies in their combination of specialised research institutes with the university, as well as their strong expertise in the natural and social sciences. This union of expertise leads to scientific breakthroughs that can quickly be put into practice and be incorporated into education.

# Good Governance of Extractive and Land Resources

📍 Hosted by Columbia Center on Sustainable Investment (CCSI). New York, USA.

🌐 [www.unsdsn.org/extractive-and-land-resources](http://www.unsdsn.org/extractive-and-land-resources)

Wind turbines and cropland / by InspiredImages

Extractive industry and land investments contribute to many states' economies, but also often burden the environments and communities near project sites. The SDSN Thematic Network on the Good Governance of Extractive and Land Resources looks at how to improve resource use, including land, for sustainable development.

As stewards of their resources, governments have a responsibility to effectively manage and regulate extractive and land investments, to leverage natural resources to provide sustained prosperity for both current and future generations and protect the rights of people living in the affected areas. Governments, but also companies, must respect individual and community rights, and comply with high international standards on environmental, social, and human rights.

## Working across the SDSN

This network recently launched a new working group on mining in partnership with the SDSN Amazonia and SDSN Member Instituto Quadrilatero from Brazil. The group will work to promote good governance in mining, and explore how mining territories can achieve the SDGs. Mining is essential as it provides the raw materials needed for the energy and

information technology transition, but must be done in such a way as to promote the achievement of environmental and social objectives.

## Looking ahead:

This network will continue to develop resources for stakeholders to support the achievement of the SDGs in the coming months, and continue to offer its massive, open online courses (MOOCs) through the SDG Academy.

## Columbia Center on Sustainable Investment (CCSI)

The Columbia Center on Sustainable Investment (CCSI), a joint center of Columbia Law School and the Earth Institute at Columbia University, is the only university-based applied research center and forum dedicated to the study, practice and discussion of sustainable international investment. Their mission is to develop practical approaches for governments, investors, communities and other stakeholders to maximize the benefits of international investment for sustainable development.

# Health for All

📍 Hosted by Barcelona Institute of Global Health (ISGlobal), Fundação Oswaldo Cruz (Fiocruz), Public Health Foundation of India (PHFI)

🌐 [www.unsdsn.org/health-for-all](http://www.unsdsn.org/health-for-all)

COVID-19 Hospital in Brazil / @Leonardo Oliveira, Fiocruz

The SDSN health for all network has proven its ability to rise to the challenge, leveraging its global expertise in response to the COVID-19 pandemic. This unprecedented health challenge has sickened millions and resulted in hundreds of thousands of deaths globally. It has rapidly redefined the ways we live and work, and its consequences will be felt for years to come.

The Network's chairs and host institutions are actively engaged in The Lancet COVID-19 Commission. The Commission is an interdisciplinary initiative that promotes solutions to improve global public health and support an equitable, transformative, green, and digital recovery ([www.covid19commission.org](http://www.covid19commission.org)). From July 2020 to June 2021 the Commission produced over twenty reports and publications. The work of the India Task Force was particularly well-received, with coverage in over 40 media outlets and thousands of impressions on Twitter. In addition, a report of the Vaccines and Therapeutics Task Force advocating for more treatment options, especially ones that are accessible in resource-poor settings, will be critical to overcoming the pandemic as vaccine rollout is likely to take years globally.

The Network also organized several events through co-host Fiocruz. On April 30th an event featuring Prof. Jeffrey Sachs discussed how to strengthen health systems to both continue responding to the current crisis and build long-term capacity for future responses. On May 26th, 2021, another event explored the human health impacts of climate change and advocated for greater attention on health at COP 26.

## Looking ahead

SDSN Health for All continues to develop resources to help governments craft science-based responses to the pandemic,

help communities and civil society organizations advocate for the social protections they need in these difficult times, and support a lasting and transformative recovery.

### Barcelona Institute of Global Health

The Barcelona Institute for Global Health (ISGlobal) was set up in 2010 as a centre of excellence in research and knowledge equipped to meet the new challenges facing global health in the 21st century. Today, ISGlobal encompasses over 30 years' experience in the field of health and is a consolidated hub of expertise in scientific research, drawing on experiences from both hospitals and academic institutions.

### Fundação Oswaldo Cruz (Fiocruz)

For over 100 years, Fiocruz has produced and disseminated knowledge and technologies to strengthen and consolidate the Unified Health System and contributed to the promotion of health and quality of life in Brazil. Fiocruz works to reduce social inequalities, support innovation, and defend the right to health.

### Public Health Foundation of India

The Public Health Foundation of India (PHFI) is a public-private initiative that has collaboratively evolved through consultations with multiple constituencies, including Indian and international academia, state and central governments, multi & bi-lateral agencies, and civil society groups. PHFI is a response to redress the limited institutional capacity in India for strengthening training, research, and policy development in the area of public health.

# Thematic Research Network on Data and Statistics (TReNDS)

📍 Hosted by SDSN Secretariat

🌐 [sdsntrends.org](http://sdsntrends.org)

SDSN's thematic research network on Data and Statistics (TReNDS) mobilizes technical and policy-oriented solutions to advance the data revolution for sustainable development. Its network of experts hail from across the global scientific, development, public, and private sector data communities. TReNDS works to strengthen the data ecosystem by advancing the use of more frequent, high-quality data to guide and spur progress and to ensure that the data revolution is grounded in strong expertise and evidence. Specifically, TReNDS aims to:

- Develop timely, multi-sectoral, policy-relevant research to strengthen the impact of local, national, and global statistical systems, focused on themes improving data use in policymaking, data governance and stewardship, new technologies, SDG monitoring, and data collaboration, thereby helping to ensure countries' data strategies capitalize on emerging good practice and partnerships.
- Translating research to policy by testing new approaches to data management, sharing, and use through projects and partnerships in countries worldwide, documenting both process and progress, to curate applied, cutting-edge approaches that are highly replicable, as well as to encourage a more open dialogue on data-related innovations, collaborations, and their sustainability.
- Continue to serve as a leading data-oriented think-tank and advisory group, working to facilitate connections between local and global data scientists and innovators, to support countries, projects, and programs with technical expertise, and to produce resources which help to empower and capacitate both local academics and governments representatives on how to navigate and harness new data sources and technologies for social good.

## Looking ahead

In 2021-22, TReNDS will expand its country engagement to improve data for development through the *Data 4 Now* (D4N) initiative, co-led by TReNDS, the World Bank, Global Partnership for Sustainable Development Data, and the United Nations Statistics Division. Guided by the specific needs of policymakers, the D4N Country Engagement Approach draws from local and global expertise to support countries in developing their data production and use capacities.

TReNDS will also develop strategies to avoid "data graveyards" by assessing the effectiveness of national government data access and use strategies.

TReNDS is also leading a workstream to improve cross-learning between Chief Data Officers in Smart Cities with national government statisticians to improve data governance throughout the data ecosystem.

Finally, by leveraging the expertise of its global network, TReNDS will work to improve south-south collaboration in improving development data, develop new collaborations between citizen science and earth observation experts, and explore how private sector sustainability reporting processes can benefit from new national standards in environmental and ecosystem accounting.

# SDSN Member Organizations

\*AS OF SEPTEMBER 1, 2021

## Afghanistan

- Afghan National Association For Adult Education (ANAFAE)
- "Afghanistan Research and Evaluation Unit"
- Bost University
- "Cheragh Medical Higher Education Institute"
- "Citizens Organization for Advocacy and Resilience"
